EASY STOCK PILING METHOD

JACK KNIFE METHOD FOR STOCK PILING

The operator first backs up straight with the truck and pup trailer to the desired location / releases tailgate and dumps the pup / lowers the pup box while pulling forward and latches tailgate / creates a jack knife pup trailer / backs the truck box up to the same pile the pup dumped and releases tailgate / dumps the truck box / lower truck box and latch before pulling forward

.....

Easy to use cab controls allow driver to stay in Truck
